

AMENDMENTS TO THE CLAIMS

**Please cancel Claims 2-10 without prejudice or disclaimer.**

**Please add new Claims 11-19 as follows:**

1.-10. (Canceled)

11. (New) An MP3 storage enabled eyeglass, comprising:

an eyeglass frame, adapted to be carried by the head of a wearer;

a first lens orbital, carried by the eyeglass frame for positioning a first lens in the path of the wearer's field of view;

a second lens orbital, carried by the eyeglass frame for positioning a second lens in the path of the wearer's field of view;

an MP3 format memory device carried inside of the eyeglass frame;

a power supply, carried by the eyeglass frame;

at least a first earphone support extending from the eyeglass frame;

at least a first earphone, carried by the first earphone support, configured to direct the first earphone towards a first ear of the wearer; and

retrieval circuitry configured to retrieve music from the MP3 format memory.

12. (New) An MP3 storage enabled eyeglass as in Claim 11, wherein the MP3 format memory and the retrieval circuitry are disposed in the eyeglass frame.

13. (New) An MP3 storage enabled eyeglass as in Claim 11, wherein the retrieval circuitry is configured to play music retrieved from the MP3 format storage through the first earphone.

14. (New) An MP3 storage enabled eyeglass as in Claim 11, wherein the eyeglass frame includes a nose bridge portion, the MP3 format memory, the retrieval circuitry, and the first earphone being disposed rearwardly from the nose bridge portion.

15. (New) An MP3 storage enabled eyeglass as in Claim 11, additionally comprising a power supply, wherein the eyeglass frame includes a nose bridge portion, the MP3 format memory, the first earphone, and the power supply being disposed rearwardly from the nose bridge portion so as to provide a better balanced distribution of weight over a wearer's head.

16. (New) An MP3 storage enabled eyeglass as in Claim 15, further comprising a second earphone carried by a second earphone support, the second earphone and the second earphone support being disposed rearwardly from the nose bridge portion.

Appl. No. : 10/004,543  
Filed : December 4, 2001

(NEW)

17. An MP3 storage enabled eyeglass, comprising:

an eyeglass frame, adapted to be carried by the head of a wearer;

a first lens orbital, carried by the eyeglass frame for positioning a first lens in the path of the wearer's field of view;

a second lens orbital, carried by the eyeglass frame for positioning a second lens in the path of the wearer's field of view;

means for storing music in an MP3 format inside of the eyeglass frame;

a power supply, carried by the eyeglass frame;

at least a first earphone support extending from the eyeglass frame;

at least a first earphone, carried by the first earphone support, configured to direct the first earphone towards a first ear of the wearer; and

means for retrieving music from the means for storing.

18. (New) An MP3 storage enabled eyeglass as in Claim 17, further comprising means for evenly distributing a weight of the means for storing, means for retrieving, first earphone support, and first earphone over a wearer's head.

19. (New) An MP3 storage enabled eyeglass as in Claim 18, wherein the means for evenly distributing comprises means for distributing the weight of the means for storing, means for retrieving, first earphone support, and first earphone over a top of the wearer's head.
